6+ YEARS **4** SHIPPED APPS **15M+** DOWNLOADS

PROFESSIONAL SUMMARY

Mobile Application Developer with 6+ years of experience building, shipping, and maintaining high-traffic Unity-based applications on the App Store and Google Play, with products surpassing millions of downloads. Strong command of the end-to-end mobile release lifecycle — from store submission and review compliance to live production support and hotfix deployment. Skilled in Firebase services, RESTful API integration, third-party SDKs, and cross-platform performance optimization across iOS, Android, and ChromeOS. A specialist in compliance-heavy consumer products (COPPA-regulated, total 15M+ downloads) delivering stable, scalable releases within cross-functional Agile teams.

Core skills: Unity & C# · Cross-Platform Mobile (iOS / Android / ChromeOS) · Mobile Release Management · Firebase · RESTful API Integration · Performance & Memory Optimization · Production Support & Hotfixes · Agile / Scrum

WORK EXPERIENCE

Software Developer (Unity / iOS / Android) 2019 – 2025
Mayadem — Digital Education & Entertainment, Istanbul

- **Shipped and maintained 4 live iOS / Android applications** (TRT Kids series + Magicpags) reaching millions of users — including a single title with 10M+ downloads.
- **Release & distribution:** Owned full App Store Connect and Google Play Console release cycles — versioning, staged rollouts, review-rejection resolution, and rapid hotfix deployment for live production apps.
- **Reliability:** Diagnosed and resolved production crashes and store-review issues across iOS and Android, raising crash-free sessions to 99.2% / cutting the crash rate by 60% (from %98).
- **Performance:** Optimized rendering, memory usage, and platform-specific behavior across iOS, Android, and ChromeOS.
- **Integrations & features:** Integrated RESTful APIs, Firebase (Analytics, Authentication), AppsFlyer attribution, and Google Sing-in / Apple Sing-in / Facebook Login to power data-driven features.
- **Testing & release validation:** Ran TestFlight internal and external beta cycles and managed Google Play internal / production tracks to validate builds before launch.
- **Compliance & mentoring:** Ensured COPPA compliance for kid-directed products and store policies; mentored intern developers within a cross-functional Agile / Scrum team.

SELECTED PROJECTS

- **TRT Kids – Kitaplık** — Android & iOS · **10M+ downloads**
  Turkey's most comprehensive digital children's library: ad-free, pedagogue-approved interactive picture books with read-aloud, animations, and a parent dashboard that tracks reading progress (ages 3–7).
  Live: Google Play · App Store
  My contribution: Developed and maintained interactive book features, integrated Firebase Analytics and Appsflyer, optimized performance and memory usage and resolved cross-platform issues across Android and iOS.
- **TRT Kids – Oyun Dünyası (Game World)** — Android & iOS · **4M+ downloads**
  Ad-free educational mini-game hub for ages 3–8 where children build their own town and play puzzle, sports, art, and music games, supported by a parent dashboard with screen-time and activity controls.
  Live: Google Play · App Store

My contribution: Developed educational mini-games, optimized gameplay performance and asset loading, implemented analytics events, improved UI interactions, and maintained Android and iOS releases.

- **TRT Kids – Anaokulum (My Kindergarten)** — Android & iOS · **1M+ downloads**
  Preschool-readiness app for ages 4+ offering a realistic kindergarten experience through experiential-learning activities across language, math, sensory, art, music, and physical play.
  Live: Google Play · App Store
  My contribution: Developed interactive educational activities, implemented analytics and event tracking, optimized application performance, improved reusable UI systems, and resolved production issues.
- **Magicpags** — iOS, Android & ChromeOS
  Mayadem's own ad-free, teacher-approved interactive reading library for children aged 3–9, published internationally with multi-device sync, child profiles, and a parent dashboard.
  Live: Google Play · App Store
  My contribution: Led ChromeOS support, integrated Unity IAP subscriptions and SSO authentication (Google Sign-In, Apple Sign-In, Facebook Login, ClassLink, Clever), implemented Firebase Analytics and Appsflyer, optimized application performance, implemented Firebase Cloud Messaging and resolved platform- specific issues across Android, iOS and ChromeOS.

TECHNICAL SKILLS

Professional

Languages & Frameworks: C#, Unity

Platforms: iOS, Android, Windows, MacOS, ChromeOS

IDEs & Version Control: Xcode, Android Studio, Git (Bitbucket), SourceTree

Release & Distribution: App Store Connect, Google Play Console, TestFlight, App Signing, Internal Testing, Closed Testing, Review Guidelines

Backend & APIs: RESTful API integration, JSON handling, Swagger

Firebase & Services: Firebase Analytics, Firebase Authentication, Firebase App Distribution, Firebase Cloud Messaging (Notification), AppsFlyer, Netmera, Unity IAP

Authentication: Google Sign-In, Apple Sign-In, Facebook Login

Practices: OOP, Clean Code, performance optimization, Agile / Scrum, Jira, CI/CD pipelines

AI-Assisted Development: GitHub Copilot, Cursor — used for faster prototyping, refactoring and code review.

Currently expanding into: AI Integrations, Native iOS - Swift, Flutter (Dart), React Native, Electron, Supabase

EDUCATION

B.Sc. in Computer Engineering [2014] – [2020]
İstanbul Şehir University — Full Scholarship, English-medium program

University Entrance Rank: 20415

Uşak Fen Lisesi (Science High School) (18862)

LANGUAGES

Turkish — Native **English** — Upper-Intermediate (B2)
